## WELCOME TO RAB 2026

We are delighted to announce that the 4th Global Conference on Robotic Assisted Bronchoscopy will return to its birthplace in Brescia, Italy, on June 18–19, 2026.

What began in 2023 as a pioneering meeting of physicians and industry innovators has now become a global reference point for the robotic bronchoscopy community. RAB 2026 marks a new chapter in this journey.

As robotic platforms become integral to interventional pulmonology across Europe, Asia, and the US and therapeutic applications such as robotic ablation begin to enter clinical practice, the congress will offer an updated and forward-looking program.

This year's edition will emphasize translational research, integration of artificial intelligence, and real-world collaboration through interactive sessions, hands-on training, and one-to-one mentoring opportunities.

Set once again in the beautiful and historic San Cristo Church, RAB 2026 will bring together experts, young physicians, and industry leaders in an atmosphere that blends science, education, and authentic connection. We look forward to welcoming you to Brescia—to share ideas, inspire innovation, and continue shaping the future of robotic bronchoscopy together.

## 2026 SPONSOR PROSPECTUS

This year, at RAB we are trying to offer an even more complete company experience: our Sponsor packages are composed to have a balanced range of items in terms of visibility, physical and in-works presence, interaction with participants and guesting delegations.

Moreover, we offer a versatile list of integrations to assure a satisfying personalization of your sponsorship.

We will have plenty of chances to furtherly target your participation during the dedicated contacts calls and meetings with you: please call us!

## CONFERENCE HIGHLIGHTS\*

- International Key Opinion Leaders and Interventional Pulmonologists coming worldwide to RAB
- The latest up-to-date relations and cases on robotic bronchoscopy and more
- Related technologies and treatments with a focus on oncology
- Moderated pro/con debates and interdisciplinary panel discussions
- Peer-to-peer hands-on sessions
- Networking opportunities and fun activities

\* Complete Conference Program will be updated at [www.robotic-rab.com](http://www.robotic-rab.com)

## EXPECTED PARTECIPANTS

- **150** Single participations (Interventional pulmonologists from EU, USA, and Asia)
- **50** Sponsor medical delegations
- **35** Board and Faculty (International KOL in Interventional pulmonology)
